Objective

I’m a web engineer, interested and passionate about web engineering’s front/back-end tech, and I hope to continue using them to be better at making the most aesthetically pleasing and dependable websites and APIs.

Work Experience (~2 Years).

Front-End Engineer

Genesis Creations S.A.E (Full - Stack Engineer): June 2022 - Feb 2024

- Developed and maintained multiple big web applications using the MERN stack.
- Developed responsive and interactive UIs with React.js/Next.js, ensuring seamless integration.
- Implemented Next.js for server-side rendering (SSR) and static site generation (SSG), optimizing performance and SEO.
- Created many APIs on the backend using Node.js and Express.js to facilitate communication between the server and the client.
- Implemented user authentication and authorization systems, ensuring secure access and data protection using JWT (JSON Web Tokens).
- Utilized Git for version control, maintaining a clean and organized codebase for collaborative development and maintained continuous integration/continuous deployment (CI/CD) pipelines.
- Demonstrated strong problem-solving skills in an Agile/Scrum environment.

Bazzar Gate (Front - End Engineer) - Feb 2024 - Present

- Designed and managed multiple large web apps using the MERN stack.
- Built user-friendly and engaging interfaces with React.js/Next.js for smooth integration.
- Engineered the utilization of Next.js for server-side rendering (SSR) and static site generation (SSG), culminating in enhanced performance and search engine optimization (SEO).

LinuTech (Front - End Engineer) - April 2024 - Present

- Use latest version of React.js/Next.js tech to build advanced and easily scalable we apps.
- Utilize Next.js for server-side rendering (SSR) and static site generation (SSG), culminating in enhanced performance and search engine optimization (SEO).

Projects:

Genesis Creations Website (Work - Finished): Developed most of a web application for presenting the company and its mission.

Bzaaarz Website (Work - Finished): Fully developed an ecommerce platform designed to provide a seamless shopping experience for users using Next.js and its related technologies.

Bzaaarz (Work - Finished): Helped develop and maintain an ecommerce application.

Bzaaarz partner (Work - Finished): Fully developed an ecommerce dashboard designed to provide a seamless management for a marketer to manage the bzaaarz products he wants to market.

Luxury Lounge kwt (Work - Finished): Fully developed a web application for presenting the company and its services and products and its CMS.

Hamcha dashboard (Work - Finished): Fully developed the dashboards that manages a financial mobile app.

TCG dashboard (Work - In development): Helping to develop most of a big management web application, (Any more details are classified).

TCG admin dashboard (Work - In development): Fully developing the CMS of a big management web application, (Any more details are classified).

Pharmacy kiosk app and its CMS website (Work - In development): Helped create a significant amount of the app and its CMS API’s routes, controllers, and models, and handled the payment and print features of the app.

Sinai Heroes Website (Work - Finished): Fully developed a web application for presenting the features of a video game developed by my current company called Sinai heroes.

VR based website (Work - In development): Helped create the app’s routes, controllers, models, the app’s authorization and authentication systems, and working on the app’s front-end functionalities.

Xena Website (Personal- Finished): Fully developed an API and a web application for a fashion store to manage, browse and buy products off it.

NFC integration to a website (Work - Finished): Fully developed and created all its routes, controllers, models and created the app’s front-end side

Restaurants API (Personal - Finished): Fully developed a restaurants API and find the best cheap restaurants close to your specified area.

Mazloun API (Work - Shipped): Helped develop a backend e-commerce API for Mazloun (Egypt) responsible for all requests made by Mazloun Website, Mazloun iOS, and Android AR applications.

Mottotalk Forum API (Personal - Finished): Fully developed an API that views others' posts and login to add your comment to these posts and say if you like them or not, or even add your own post and share your opinion on any subject of your choice.
